An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-22, drawn to a foldable container with specific fastening mechanism, classified in class 220 subclass 7.
- II. Claims 23-35, drawn to a foldable container with a general fastening mechanism operable either inside or outside the container wall with a specific type of wall structure, classified in class 220 subclass 660.

The inventions are distinct, each from the other because:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require the elastic spring element contained within the fastening mechanism. The subcombination has separate utility such as it can be used with any sidewall structure inside or outside a container.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Since applicant has received the action of merit on claims 9-22, therefore invention I has been constructively elected by original presentation for prosecution on the merits. Claims 23-35 have been withdrawn from consideration.

Furthermore, since invention I, namely claims 9-22 are allowable, claims 23-35 have been canceled.

The following is an examiner's statement of reasons for allowance: None of the references shows a fastening mechanism having a bolt and elastic spring located within the fastening mechanism.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
